We received copies of LAC DPH's report for its inspection of the exterior of CHE and the 6th Floor of CHE. Their report is attached.

The reports are as we expected. LAC DPH found no evidence of a rodent infestation or rodent activity on the 6th Floor of CHE. There is no re-inspection planned. LAC DPH did find evidence of active rodent burrows and runways in several areas around CHE. They attached a map of the active areas to their inspection report. LAC DPH has scheduled a re-inspection of the exterior of CHE on February 28. I am working to get a specific time for the re-inspection. We will make sure we're present for that.

LAC DPH's recommendations are as follows, all of which we are actively pursuing with GSD, RAP, BSS, LASAN, and Cats USA:

1. Trim back all overgrown vegetation in all planters.
2. Knock down/collapse all active burrows in all planters.
3. Remove all trash and dead vegetation from planters and eliminate rodent harborage conditions.
4. Remove all fruit bearing bushes from all planters and eliminate other food sources, such as food debris and trash.
5. Provide an effective rodent control program to include the following:
  1. Place bait station program in all active planters to control rodent activities.
  2. Provide map and log for the bait station program.
  3. Number all bait station as indicated in the bait station map.

Thanks.

Brian

Good afternoon Mr. Buchner,

Please see the attached inspection reports related to our inspections at City Hall East and the Civic Center Plaza area on February 6, 2019. The attached map correlates with the locations noted on the Plaza inspection report (C00161869). Please note that we have scheduled to revisit the Civic Center Plaza on Thursday, February 28, 2019.

Please let me know if you have any questions.

Regards,

Fwd: Request for Copy of DPH City Hall East Ins...
